DIRECTIONS FOR USE

- Apply to dry foliage and irrigate after 1-2 days if no rain has fallen.
- Irrigation will aid dispersion and minimise any risk of mower pick-up on close mown surfaces.
- Avoid applications during frosty or drought conditions.
- Delay verti-cutting and/or grooming for 3 days after application to allow the granules to disperse.
- Do not apply to newly sown or turfed areas for 6 months after establishment.
- Avoid contact/drift onto all broadleaved plants outside the target area.
- Treat areas with bulbs only after the foliage has died down.
- Grass should not be cut for 2-3 days before or after application.
- The first 4 mowing after treatment should not be used as a compost or mulch unless composted for 6 months.
- Re-seeding of bare batches should not be carried out until 8 weeks after treatments.
- Avoid walking on treated areas until it has rained or irrigation has been applied.
- Do not apply more than 3 applications per year.
