

Product Information

Osmocote[®] Exact[®] Mini

16+8+11+2MgO+TE

PRODUCT DESCRIPTION

Osmocote Exact Mini has been specially developed for applications in small substrate volumes. It is therefore ideal for pots smaller than 8 cm in diameter like plugs and trays with small compartments. The granules are 6 times smaller than the “standard” Osmocote Exact granules, yet this mini version still performs just as well. A good distribution can be achieved even in volumes starting at 20 ml.

Osmocote Exact Mini has a longevity of 3-4 months and contains a complete package of trace elements and magnesium.

PRODUCT ADVANTAGES

1. The reliability of Osmocote Exact, which can also be applied in pots with small volumes
2. Uniform plant growth thanks to good distribution of the granules
3. 100% coated & 100% safe for plants
4. Every granule contains all nutrients
5. Easy, accurate dosage
6. Nutrition and irrigation are separated and therefore both optimized!
7. Very easy to apply through mixing or topdressing

PRODUCT CHARACTERISTICS

Bucket net weight: 10 kg
Product code: 8850

DIRECTIONS FOR USE

Osmocote Exact Mini can be applied by mixing in the growing medium or by topdressing once the roots are developed. Osmocote Exact Mini is primarily applied in order to bridge the period from rooting to re-potting. Cuttings substrate is generally very low in nutrients and additional fertilizing via the sprinkler system is often not convenient.

Longevity of Osmocote Exact Mini is affected by temperature.
(Stated longevity at 21° C)

16 °C	21 °C	31 °C

Store under dry conditions. Buckets should be closed well.

GUARANTEED ANALYSIS

16%	TOTAL NITROGEN (N) 7,5% Nitrate nitrogen 8,5% Ammonical nitrogen
8%	PHOSPHORIC PENTOXIDE (P₂O₅) Soluble in neutral ammonium citrate and in water, 5,8% water-soluble
11%	POTASSIUM OXIDE (K₂O) 11% Water-soluble
2,0%	MAGNESIUM OXIDE (MgO) 1,0% Water-soluble
0,02%	Boron (B)
0,050%	Copper (Cu)
0,40%	Iron (Fe) 0,08% EDTA chelated
0,05%	Manganese (Mn)
0,020%	Molybdenum (Mo)
0,018%	Zinc (Zn)

RECOMMENDED APPLICATION RATES

	Mixed in substrate	Broadcast
Bedding plants	1,5-2 g/l	40-60 g/m ²
Vegetable young plants	2-3 g/l	50-70 g/m ²
Fast growing cuttings	1,5-2 g/l	30-50 g/m ²
Mini Pot plants	1,5-2,5	30-50 g/m ²
Forestry cuttings	1-2 g/l	30-50 g/m ²
Forestry seedlings of species germinating within 2 months	1-2 g/l	30-50 g/m ²
Nursery stock cuttings	1-2 g/l	30-50 g/m ²

ATTENTION

Rates are based on unfertilized substrates. pH has to be adjusted according to crop requirements. Please be aware that these are general recommendations. Specific situations such as use in tunnels or green-houses, autumn or winter pottings or specific climate conditions require adjustments. Contact Scotts for more detailed advice. Trial first on a small scale before rate, application or other changes in your cultural practices are implemented. As circumstances can differ and as the application of our products is beyond our control, Scotts cannot be made responsible for any negative results.
