Sierraform[®] GT

6-8
WEEKS

Anti-Stress 15+0+26+Fe

Itemcode: 4105

15+00+21.6+Fe

PRODUCT DESCRIPTION

Sierraform GT contains both slow release nitrogen and slow release potassium, along with conventional release N, P and K in a single compound micro granule. The slow release nutrition from Sierraform GT range promotes strong healthy turf grass growth and is particularly suited for use on fine turf areas.

PRODUCT ADVANTAGES

1. Ideal for applying as a pre-stress conditioner.
2. Half of nitrogen is slowly available to minimise surge growth.
3. High Potassium content to harden turf in stressful summer or autumn conditions.
4. Phosphate free formulation aids management of soil Phosphorus build-up.

DIRECTIONS FOR USE

- Apply to dry foliage and irrigate after 1-2 days if no rain has fallen. Irrigation will aid dispersion and minimise any risk of mower pick-up on close mown surfaces.
- Avoid applications during frosty or drought conditions.
- Delay verti-cutting and/or grooming for 3 days after application to allow the granules to disperse.
- Nitrogen release is significantly slowed down when soil temperatures are less than 10°C.
- Watering-in after application will minimize foot printing risk.
- If spilt on paving slabs, concrete, clothes etc. brush off immediately, as product may cause discolouration.

STORAGE

Keep away from heat and sources of ignition. Keep away from food, drink and animal feeding stuffs. For quality reasons: Keep out of reach of direct sunlight, store under dry conditions, partly used bags should be closed well. Keep at temperatures between 0°C and 40°C.
