

Product information

Agroblen®

Controlled Release Fertilizer

15+09+09+3MgO

12 – 14 months

SPECIFIC USAGE

Base fertilizer for open field crops and trees.

PRODUCT DESCRIPTION

Agroblen 15+09+09 is a completely controlled release fertilizer. The superior resin coating technique is used for coating the spherical granules. This creates the safest fertilizer Scotts can offer. The product can be placed directly in the row. All nitrogen, phosphate as well as the potassium part of this base fertilizer are fully coated. The release period is 12 - 14 months.

	N	P ₂ O ₅	K ₂ O
Coated	100 %	100 %	100%

PRODUCT ADVANTAGES

- The perfect fertilizer for year round crops and trees. The 100% coated N, P and K allows you to use this product in salt sensitive crops. The nutrients become available for the crop over a period of 12 - 14 months after application;
- Product fits in re-plantation programs like eucalyptus, olive-trees, vineyards etc. Planting hole application is safe due to the 100% resin coating;
- Magnesium is uncoated therefore the total coating percentage of this product is 90%;
- Your crop will have nutrients available at all stages of the crop cycle;
- Steady and even nutrient release will lead to uniform crop growth;
- Agroblen is safe to use, with low EC in the soil in the early stage of the crop when roots are still sensitive to high salt concentrations;
- With Agroblen you minimize leaching of nutrients through rainfall or irrigation;
- This balanced product with the emphasis on N provides the nutrients for a complete crop cycle;
- Combining Agroblen 15+09+09 with a water soluble fertilizer in the second half of the growing season leads to the best results.

RECOMMENDATION

	Row application	Broadcast
Field grown nursery stock	400 - 800 kg/ha	500-1000 kg/ha
Conifers / ornamentals	Planting hole 20 – 30 gr/plant	

15+09+09+3MgO

12 - 14 months

DIRECTIONS FOR USE

- To be applied by row application, broadcasting or planting hole;
- Do not apply Agroblen more than 1-2 weeks before planting;
- Work Agroblen in the soil at a minimum depth of 5 cm and maximum depth of 10 cm;
- Close to the plant but not closer than 5 cm;
- Never directly under the plant. For planting hole application put some soil on the fertilizer before planting the tree;
- Place Agroblen under the dripper;
- Irrigation after planting improves product and plant performance;
- Do not use application equipment that will grind particles or damage the fertilizer coating.

GUARANTEED ANALYSIS

15 % Nitrogen (N): 6,5 % nitrate nitrogen, 8,5 % ammoniacal nitrogen
9 % Phosphorus Pentoxide (P₂O₅)
9 % Potassium Oxide (K₂O) water soluble
3 % Magnesium oxide (MgO)
11,5 % Sulphur Trioxide (SO₃)
4,6 % Sulphur (S)

PRODUCT CHARACTERISTICS

Particle size: 2,0 – 4,0 mm
Bulk density: 990 kg/m³
Longevity: 12 - 14 months 21°C average soil temperature
Color: various
Item code: 8667.03.01Y1

ATTENTION

As circumstances can differ and as application of products is beyond our control, Scotts cannot be made responsible for any negative results. With this publication, all previous given recommendations expire. Before a new rate, product or application method is used, a small scale trial is recommended.
