

Product Range information

Fairwaymaster®

2-3
MONTHS

BRAND DESCRIPTION

Fairwaymaster contains a combination of controlled release fertilizer technology with compound granular fertilizers in a mini prill formulation. This controlled release technology leads to regular growth without growth peaks. The uncoated portion of this fertilizer allows an immediate response of the turf.

FORMULATION TYPE

Mini prill.

BRAND ADVANTAGES

1. Contains combination of controlled release nitrogen and conventional fertilizers.
2. Quick reaction and longevity in one product.
3. Suitable for use on turf mown above 6mm.
4. Free flowing with good spread characteristics.
5. High analysis + low application rate = cost effective + less bags to handle.
6. Extremely safe to use due to controlled nutrient release N&K and low Salt Index.

TECHNOLOGY

MU	Fused K	Pro-Lite	T-max	Poly-S	Resin	Organic	Conventional

USE

Green	Tee	Fairway	Sports field	Amenity

PERFORMANCE*

Granule dispersal: 7 days (visually dispersed from surface)

Turf response: 7 days

Longevity: 2-3 months

* depending on environmental factors

Growing success

TECHNOLOGY STATEMENT

Poly-S is a controlled release nitrogen source that delivers nutrients gradually over the claimed longevity. By utilising a combination of primary sulphur coating followed by an exclusive outer polymer coating, the release is more predictable and the risk of catastrophic release seen with sulphur coated ureas is avoided. Nutrient release is primed by moisture permeating through the outer polymer channels, through cracks in the sulphur layer and into the nutrient core where the urea is solubilised. Once the urea is solubilised, it will then move back through the same pathways to the outside where it is released and made available for plant uptake. Large changes in soil temperature and/or moisture do not result in severe fluctuations in the release pattern, ensuring that the Poly-S provides a non-surge growth characteristic accompanied by healthy green turf. In dry or cold conditions nutrient release will slow or stop all together.
